Re: Soil and water sample analyses of
crop sprayer locations at Greater
Kankakee Airport

Dear Mr. Hearn:

As previously requested by your agency, the Airport Authority is submitting the enclosed above mentioned information for your review.

It is our sincere hope that the positive results as stated within Gulf Coast Laboratories' "letter of opinion", will alleviate any further environmental concerns which the Illinois EPA may have regarding this sampling site.

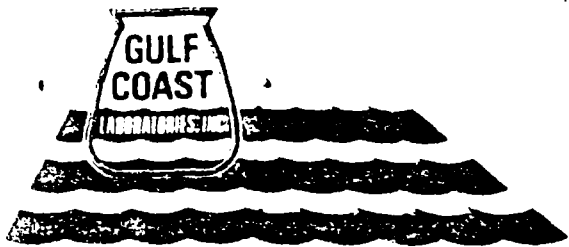

Please contact me if I may be of further assistance on any of the above mentioned matter.

Sincerely,
KANKAKEE VALLEY AIRPORT AUTHORITY

RE: Russ Aviation Samples

Dear Mr. Skorepa:

On December 26, 1984, GULF COAST LABORATORIES, INC. submitted analytical reports on three (3) water samples and one (1) soil sample collected by GULF COAST LABORATORIES, INC. and Groff Testing on December 7, 1984.

These samples were analyzed for organo-phosphate pesticides, chlorinated pesticides, and herbicides. Please find enclosed copies of these reports.

The results of these analyses indicate no contamination at drinking water standards for the water samples and no contamination above detection limits for the soil sample.

Therefore, based on these four samples, there appears to be no contamination of the organo-phosphate pesticides, chlorinated pesticides, or herbicides.

If you have any questions, please contact our laboratories.

Sincerely,

GULF COAST LABORATORIES, INC.

Donald Gipple
